Stimulation Device; .

An electronic acu-point therapy aide and stimulating device implemented using a hand-held or palm-held electronic computing device or another computing device which may be a designated unit. The electronic acupressure aide and stimulating device allows a practitioner to apply a pulse sequence to a set of predetermined acu-points such as those related to acupressure, acupuncture, trigger points or Jin-Shin Jyutsu, to name a few. A displayed chart related to the acu-points identifies the health condition and the pulse sequence.

This protection have nearing Zero risk of been hacked or infected through a network. As small IC processor hardware becomes cheaper, this protection method is becoming cost effective and affordable.

System and methods for protecting against cyber threats through a hardware cell layer separated from a body of a computer and/or a network of computers are disclosed. The connection from the protective cell layer is only made to the core when incoming data are thoroughly examed and passed as safe to forward to the body of computer or a network of computers.

The system includes an external network accessing layer (ENAL) and a core computing asset overlaid by the ENAL. The ENAL comprises at least one external network access cell (ENAC), wherein the at least one ENAC contains at least one communications port, one or more processors, working and storage memories and is configured to be connectable to an external network and to inspect data received from the external network. The core computing asset is separated from the external netword by the overlayer by the ENAL while an incoming access attempt and/or data is examed.

Emergency & Back Up Cooling for Nuclear Reactors.	Title
7/19/2016	Issue Date
I used this invention to save Japan from having to evacuate Tokyo, and having a large part of Japan become uninhabitable as the Fukushima Daichi Nuclear Power Plants were having chain explotions. It was this invention that stopped the explotions and quickly cooled the reactors. The Japanese Cabinet Secretary at the time told me that the Japanese Government had many hundreds of Japanese nuclear scientists working on finding a solution, and the world had thousands helping, but no solution was in view, and Japan was evacuating Tokyo if I had not called him to give him my solution to that disaster. This was later confirmed in a book the Prime Minister worte of the events. Only the Prime Minister stated that un-exeptedly, God stepped to help the Japanese people. What he was really saying, is that God sent me to stepped in to help the	Comments

Nitrogen is innert. It does not react with anything. When Liquid Nitrogen meets heat, it rapidly changes phase to gas, expanding tremendously in volume, dilute any combustion gases and starve a fire and/or pending fire and explosions of oxygen, thus put out the fire and prevents explosion.
